Pain Removed. Life Improved.

We offer the latest technology in health care for your pet.

This FDA cleared deep penetrating light allows relief of pain through the release of endorphins and stimulates the injured cells to heal at a faster rate.

When choosing a treatment option for your pet there is now an alternative to pharmaceuticals.

The Companion Therapy Laser System can provide immediate results without any dangerous side effects.

Drug Free.
Surgery Free.
Noninvasive.
**Alternative To
Pain Relief For
Your Pet.**

Class IV Deep Tissue Laser Therapy uses a beam of laser light to deeply **penetrate tissue** without damaging it. Laser energy induces a biological response in the cells called "photo-bio-modulation", which leads to **reduced pain, reduced inflammation, and increased healing speed.**

The laser light is delivered through a noninvasive hand piece to treat the affected area. Your pet may feel a gentle and soothing warmth. Most treatments take a matter of minutes.

Treatment protocols are unique to each patient and condition. Therefore, treatments will vary in time, complexity and cost.
